

Our concise summaries save you hundreds of hours of time reading long commission orders which may not even impact your company.

Regulatory Bulletin Service for FCC and PUC

Regulatory Bulletin Service provides email bulletins regarding regulatory developments in States and at the FCC to help your company stay informed of the constant shifts in telecom regulation. Each comprehensive bulletin summarizes the impact and any action you may need to take. Our concise summaries save you hundreds of hours of time reading long commission orders which may not even impact your company. Our experts cull through the activity in all 50 states and at the FCC and identify those issues important to your business, saving your valuable time and internal resources.

Support data is provided to ensure you have the necessary rules, orders, or other documentation for reference.

This service can be customized to your operations' needs. You determine the categories and jurisdictions you wish to monitor. In fact changing the focus of your monitoring service at any time is simple! Just add or delete jurisdictions and services as your business grows and changes.

Rule changes and docket activity are monitored by carrier/service type:

- Local** – including such issues as UNE rates and unbundling requirements, collocation, numbering, VoIP, service quality, outage reporting, customer service and billing rules, and carrier change/slamming
- IXC**
- Operator Service**
- Debit**
- Inmate**
- Payphone**

Regulatory bulletins are issued as events happen, usually daily.

This service is a great fit for managers with regulatory responsibilities and legal departments of telecom providers who need timely, in-depth analysis of regulatory actions.
