

At-a-glance information combining pending and completed proceedings regarding Voice over Internet Protocol services, and related fees that VoIP providers are obligated to pay.

VoIP Policy Monitor

More than half of the states and the FCC require interconnected VoIP providers to pay fees for either 911, USF, or TRS. Are you compliant?

Whether currently providing VoIP services or considering utilizing VoIP options in your business plan to open new markets, you must keep advised of state or federal proceedings that may impact your plans.

TMI combines both regulatory decisions and related fees or contribution levels into one convenient Excel workbook to help VoIP providers understand complex policy decisions and how they are implemented by state utility commissions or other agencies.

The VoIP Policy Monitor assists you in:

- Monitoring VoIP policy developments at the FCC
- Easily determining if a state requires registration or certification
- Finding what 9-1-1 fee obligations exist
- Identifying USF contribution levels
and
- Recognizing Telecommunications Relay Service (TRS) compliance requirements

Access to important support documents and other valuable information contained in the VoIP Policy Monitor include:

- **Over 100 detailed TMI Regulatory Bulletins**
- **TMI's white paper titled "FCC Policy Regarding VoIP" that contains links to key legislative documents, TMI Bulletins, and more.**

Recommended For . . .

Any company considering, or currently offering VoIP services.
