

TMI's ***WILD Pricing Guide*** is ideal for competitive local telecom providers to easily identify vital information necessary to make decisions regarding sales forecasts and network costing issues!

## ***WILD Pricing Guide***

TMI's Wire Center Impairment Listing and DS1/DS3 Pricing Guide (**WILD**) is the only "one stop" resource of this kind for telecom providers wishing to identify whether unbundled transport and high capacity loops are still available, and as an alternative, the special access rates that are in place in any market.

The ***WILD Pricing Guide*** assists companies with features such as:

- Identifies whether unbundled transport and high capacity loops are available for user selected locations
- Provides BOC Interstate special access month-to-month and term pricing between two points utilizing NPA/NXX for an individual circuit/loop
- Worksheets listing tariffed rate elements for cross connect charges, local channel terminations, interoffice transport plus miscellaneous optional features, and non-recurring charges

Recommended for . . .

Key personnel with CLECs, IXCs, or any integrated telecom service providers involved with sales forecasts and network costing processes will find this guide useful.
